

# TYPHOON ACOUSTIC SLIMLINE 5.1 SYSTEM

## PRODUCT SPECIFICATION

### Introduction

Watching movies, playing games or listening to music on your PC? ... LET the Typhoon Acoustic Slimline 5.1 handle the acoustic production. Standard 2.1 and 4.1 systems are ideal for general works but when comes to Home Theatre standard, let the Typhoon Acoustic Slimline 5.1 take over.

Build with 5 sets of micro drivers for surround effects and accurate acoustic productions. The Center speaker handles the fluid surround movements. The Subwoofer produces the deep bass and depth of the acoustic. Together the Typhoon Acoustic Slimline 5.1 produces stunning sound production when connects to any AC3 or Dolby Digital Encoder for Home Theater effects. Alternatively, when played with 5.1 Sound card in the PC, it equally produces dynamic sound movements with any AC3 or Dolby Digital playback software.

### FEATURES

#50218

- 70 Watts of Total System Power
  - Ported, Dual Subwoofer Drivers
  - 4-Speaker Surround, 1-speaker center
  - High Performance Micro Drivers
  - Neodymium drivers
  - Magnetically shielded
